

Talos

from
KegLand

Guarantees Freshness

The inner mylar bag is impermeable to external gasses, ensuring longevity and eliminating the risk of unwanted carbonation and oxidation.

Compatible with Any Bar

All KegLand Talos kegs now come compatible for A-type couplers as standard. Meaning your wine can move right in.

Removes Dispensing Gas barriers

No specialist gas needed to dispense. The kegs can even be dispensed with air! Perfect for wine and cocktails.

Ready to Fill

The mylar bag is sterilized and evacuated of all oxygen during manufacture. That's one less cleaning task to worry about.

Removes Logistical Nightmares

Talos kegs are super lightweight, one-way and recyclable. You'll no longer be freighting empty kegs up and down the country or wondering where they got to. Perfect for local, interstate and even international distribution.

Still, Sparkling or Inbetween

Bursting with bubbles or a full bodied red. A fizzy Hefeweizen or a soft Best Bitter. Talos Kegs are up to the job.
